 (A) 1 and 2 (B) 2 and 3 (C) 3 and 1 (D) 1, 2, and 3
- Q.75. Match List I (Factory) with List II (Place)**
- |                          |                |
|--------------------------|----------------|
| <b>List I</b>            | <b>List II</b> |
| 1-Integral Coach Factory | a-Kapurthala   |
| 2-Rail Coach Factory     | b-Lucknow      |
|                          | c-Perambur     |
- (A) 1-a, 2-b (B) 1-a, 2-c (C) 1-c, 2-b (D) 1-c, 2-a
- Q.76. How many zeros are there from 1 to 200?**  
 (A) 20 (B) 21 (C) 30 (D) 31
- Q.77. If BURNER is coded as CASOIS then how will ALIMENT be coded?**  
 (A) BKJLFMU (B) EKOLIMS (C) EMONIOU (D) BRJSFTU
- Q.78. Find the missing number**
- |    |   |   |
|----|---|---|
| 3  | 4 | 5 |
| 8  | 7 | 6 |
| 9  | * | 7 |
| 11 | 9 | 3 |
- (A) 8 (B) 10 (C) 12 (D) 14
- Q.79. Which number should replace the question mark?**
- |    |    |   |   |
|----|----|---|---|
| 17 | 8  | 5 | 5 |
| 13 | 7  | 5 | 4 |
| 6  | 12 | 6 | 3 |
| 10 | 6  | 4 | ? |
- (A) 4 (B) 5 (C) 6 (D) 7
- Q.80. What comes next in the series 403, 296, 198, 109, . . . ?**  
 (A) 29 (B) 58 (C) -4 (D) 98
- Q.81. What percent is 5% of 3%?**  
 (A) 1.6% (B) 6.1% (C) 60% (D) None of the above
- Q.82. In an office 65 files are placed one over the other. JK's file is 33rd from the top. If the last file is given the first position then on this basis what is the position of JK's file?**  
 (A) 32<sup>nd</sup> (B) 33<sup>rd</sup> (C) 34<sup>th</sup> (D) Data inadequate
- Q.83. If 'a' means '÷', 'b' means '+', 'c' means '-' and 'd' means 'x'. then—  
 11 b 15 c 8 a 4 d 5 = ?**  
 (A) 36 (B) -16 (C) 26 (D) 16
- Q.84. Mr X is facing south. Which one of the following turns will make him face back to South?**  
 (A) Left, Left, Right, Right, Right, Left, Left, Left, Left, Right  
 (B) Left, Right, Right, Left, Left, Left, Left, Right, Right, Right  
 (C) Right, Left, Left, Left, Left, Right, Right, Left, Left, Right  
 (D) Right, Left, Left, Right, Right, Left, Right, Left, Right, Right
- Q.85. How many 3 digit numbers have digits in increasing order?**  
 (A) 28 (B) 42 (C) 84 (D) 168

- Q.86.** The officials Ajit, Balwinder and Charan are assigned some cases. On some day, Ajit distributes to Balwinder and Charan as many cases as they had. After a month Balwinder gave as many cases to Ajit and Charan as many as they have. After a month Charan did the same thing. At the end of this transaction each one of them had 24. Find the cases each originally had?  
 (A) 39, 21, 12                      (B) 36, 24, 12                      (C) 42, 16, 14                      (D) 32, 22, 18
- Q.87.** If  $\frac{1}{3}$  rd of a work is completed on the 1st day and  $\frac{3}{4}$ th of the remaining on the second day, then how much work is left at the end of the second day?  
 (A)  $\frac{1}{6}$ <sup>th</sup>                      (B)  $\frac{1}{12}$ <sup>th</sup>                      (C)  $\frac{1}{8}$ <sup>th</sup>                      (D)  $\frac{1}{9}$ <sup>th</sup>
- Q.88.** A family is having one grandfather, one grandmother, two mothers, two fathers, one mother-in-law, one father-in-law, four children, three grandchildren, one brother, two sisters, two sons, two daughters and one daughter-in-law. How many (minimum) members are there in the family?  
 (A) 5                      (B) 7                      (C) 9                      (D) 11
- Q.89.** As many as 100 cases were examined by three examiners. While 40 were cleared by the First examiner, 39 were cleared by the Second and 48 by the Third. Further, it was found that while 9 were cleared by first two examiners only, 19 were not cleared by first two only. If 19 were cleared by all the three examiners, how many cases were cleared by at least two examiners?  
 (A) 28                      (B) 38                      (C) Data inconsistent                      (D) Data inadequate
- Q.90.** Six friends go out for dinner. In how many ways they can sit around a round table to have dinner?  
 (A) 60                      (B) 120                      (C) 144                      (D) 720
- Q.91.** If in a language '1' is written as '1', '2' as '10' and '3' as '11', then '4' will be written as:  
 (A) 110                      (B) 100                      (C) 111                      (D) 101
- Q.92.** If three coins are tossed simultaneously, in how many ways at least two heads can occur?  
 (A) 2                      (B) 3                      (C) 4                      (D) 5
- Q.93.** Driving uphill a bus driver drives at the speed of 15 km/hr and takes rest for 15 minutes after an hour of drive. In how much time the driver will cover the distance of 150 kms?  
 (A) 11 hours and 30 minutes                      (B) 12 hours and 15 minutes  
 (C) 12 hours and 30 minutes                      (D) 13 hours
- Q.94.** If in an arithmetic progression, the sum of 3rd and 15th elements is equal to the sum of 6th, 11th and 13th elements in the same series then which element of the progression should be zero?  
 (A) 1<sup>st</sup>                      (B) 9<sup>th</sup>                      (C) 12<sup>th</sup>                      (D) None of the above
- Q.95.** If January 1 is Saturday, then which month, in a non-leap year, will also have Saturday on its first date?  
 (A) April                      (B) August                      (C) May                      (D) October
- Q.96.** The present ages of Sukhi and Amrinder are in the ratio of 5 : 4 respectively. After three years, the ratio of their ages will become 11 : 9 respectively. What is the present age of Amrinder?  
 (A) 24                      (B) 27                      (C) 40                      (D) Cannot be determined
- Q.97.** The average age of employees working in an office is 30 years. If next year, ten workers retire, then to compute the average age in the next year, which of the following two statements is/are must?  
 I. Retirement age is 60 years.  
 II. There are 50 employees in the department.  
 (A) I alone sufficient                      (B) II alone sufficient  
 (C) Both I & II are not sufficient to answer                      (D) Both I & II are necessary to answer
- Q.98.** In an office there are 39 persons who can complete a job in 12 days, working 5 hours a day. In how many days will 30 persons, working 6 hours a day, complete the job?  
 (A) 10                      (B) 13                      (C) 14                      (D) 15

- Q.99. In what ratio must a shopkeeper mix two varieties of potatoes costing Rs.15 and Rs.20 per kg respectively so that he could sell the same at Rs.16.50 kg?**  
(A) 3 : 7                      (B) 5 : 7                      (C) 7 : 3                      (D) 7 : 5
- Q.100. A train and a car start from a point X. The train can travel 50% faster than the car. Both reach a point Y 75 kms away from X at the same time. If on the way, the train stops for about 12.5 minutes at the stations, then what is the speed of the car?**  
(A) 100 kmph                      (B) 110 kmph                      (C) 120 kmph                      (D) 130 kmph
- Q.101 If we want to select all text in Microsoft word, we will use shortcut key:**  
(A) CTRL + S                      (B) CTRL + C                      (C) CTRL + A                      (D) CTRL + V
- Q.102 Selecting text means, selecting**  
(A) A word                      (B) A complete line                      (C) An entire sentence                      (D) Any of the above
- Q.103 The header and footer can be added by choosing header and footer option from \_\_\_\_\_ Menu.**  
(A) File                      (B) Insert                      (C) Page Layout                      (D) View
- Q.104 You can edit an embedded organization chart object by**  
(A) Clicking edit object  
(B) Double clicking the organization chart object  
(C) Right clicking the chart object, then clicking edit MS-Organization Chart object  
(D) B and C both
- Q.105 Which of the following is not a way to cut text?**  
(A) Select the text and press the delete button  
(B) Select the text and select Edit, Cut from the menu  
(C) Select the text and click the Cut button on the toolbar  
(D) Select the text and press Ctrl + X
- Q.106 The slide that is used to introduce a topic and set the tone for the presentation is called the**  
(A) Table slide                      (B) Graph slide                      (C) Bullet slide                      (D) Title slide
- Q.107 The advantage of using a spreadsheet is:**  
(A) Calculations can be done automatically  
(B) Changing data automatically updates calculations  
(C) More flexibility  
(D) All of the above
- Q.108 Which of these will select all the cells in a document?**  
(A) Clicking three times with the right mouse button in the spreadsheet  
(B) Using the Edit –copy button  
(C) Pressing Ctrl + A on the keyboard  
(D) Pressing Ctrl + S on the keyboard
- Q.109 This type of software contains rows and columns.**  
(A) Drawing                      (B) Spreadsheet                      (C) Database                      (D) Word processing
- Q.110 How are data organized in a spreadsheet?**  
(A) Lines and spaces                      (B) Layers and planes  
(C) Rows and columns                      (D) Height and width
- Q.111. Authority, discipline, unity of command, and unity of direction are**  
(A) Taylor's four principles of management.  
(B) Principles of the human relations movement.  
(C) Elements of Weber's ideal bureaucratic structure.  
(D) Four of Fayol's fourteen principles of management
- Q.112. The decision-making model consists of four styles: directive, analytic, behavioral and \_\_\_\_\_.**  
(A) Conceptual                      (B) Intuitive                      (C) Group interaction                      (D) Laggard
- Q.113. The process by which a sender transmits content is known as**  
(A) Encoding                      (B) Decoding                      (C) Feedback                      (D) Receiver

- Q.114. Which of the following is a quantitative method for evaluating the segments:**  
 (A) Econometric Model (B) Delphi Method  
 (C) Box Jenkins Method (D) Regression Analysis
- Q.115. If your company wants to enter into international market, it can not use the mode of:**  
 (A) Licensing (B) Joint Venture  
 (C) Franchising (D) Inland Branch Expansion
- Q.116. Which of the following transitions is the highest energy transition?**  
 (A)  $n$  to  $\pi^*$  (B)  $n$  to  $\sigma^*$  (C)  $\sigma$  to  $\sigma^*$  (D)  $\pi$  to  $\pi^*$
- Q.117. The Brownian movement in colloids is due to:**  
 (A) charge on the components of colloidal sol  
 (B) collisions between colloidal particles (dispersed phase with molecules of dispersion medium)  
 (C) Tyndall effect  
 (D) all of these
- Q.118. Which of the following statement is correct about universal indicator?**  
 (A) It is a mixture of HCl and NaOH  
 (B) It is a solution of methyl orange in alcohol  
 (C) It is a solution of phenolphthalein in alcohol  
 (D) it is a mixture of many indicators
- Q.119. A bright nail is placed in a beaker containing aqueous copper sulphate solution. The nail is taken out after 20 minutes. The deposit formed on iron nail is of:**  
 (A) copper sulphate (B) iron sulphate (C) copper metal (D) copper oxide
- Q.120. A liquid is found to scatter a beam of light but leaves no residue when passed through the filter paper. The liquid can be classified as:**  
 (A) oil (B) colloidal sol (C) a suspension (D) true solution
- Q.121. What is the best name for the following compound?**

- (A) 2-propyl-1, 3-butadiene (B) 3-methylene-1-hexene  
 (C) 2-vinyl-1-pentene (D) 2-ethenyl-1-pentene
- Q.122. Phenol, when it first reacts with concentrated sulphuric acid and then with concentrated nitric acid, gives**  
 (A) 2,4,6-trinitrobenzene (B) o-nitrophenol (C) p-nitrophenol (D) nitrobenzene
- Q.123. Which of the following factors is of no significance for roasting sulphide ores to the oxides and not subjecting the sulphide ores to carbon reduction directly?**  
 (A) Metal sulphides are thermodynamically more stable than  $\text{CS}_2$   
 (B)  $\text{CO}_2$  is thermodynamically more stable than  $\text{CS}_2$   
 (C) Metal sulphides are less stable than the corresponding oxides  
 (D)  $\text{CO}_2$  is more volatile than  $\text{CS}_2$
- Q.124. Which one of the following is the correct statement?**  
 (A) Boric acid is a protonic acid  
 (B) Beryllium exhibits coordination number of six  
 (C) Chlorides of both beryllium and aluminium have bridged chloride structures in solid phase  
 (D)  $\text{B}_2\text{H}_6 \cdot 2\text{NH}_3$  is known as 'inorganic benzene'

- Q.125. Among the following substituted silanes the one which will give rise to cross linked silicone polymer on hydrolysis is  
(A)  $R_4Si$  (B)  $RSiCl_3$  (C)  $R_2SiCl_2$  (D)  $R_3SiCl$
- Q.126. In a compound atoms of element Y from ccp lattice and those of element X occupy 2/3rd of tetrahedral voids. The formula of the compound will be  
(A)  $X_4Y_3$  (B)  $X_2Y_3$  (C)  $X_2Y$  (D)  $X_3Y_4$
- Q.127. Amount of oxalic acid present in a solution can be determined by its titration with  $KMnO_4$  solution in the presence of  $H_2SO_4$ . The titration gives unsatisfactory result when carried out in the presence of  $HCl$ , because  $HCl$   
(A) gets oxidised by oxalic acid to chlorine  
(B) furnishes  $H^+$  ions in addition to those from oxalic acid  
(C) reduces permanganate to  $Mn^{+2}$   
(D) oxidises oxalic acid to carbon dioxide and water
- Q.128. Which one of the following pairs of species have the same bond order?  
(A)  $CN^-$  and  $NO^+$  (B)  $CN^-$  and  $CN^+$  (C)  $O^-$  and  $CO^-$  (D)  $NO^+$  and  $CN^+$
- Q.129. An example of a biological control against insects is the use of  
(A) herbicides (B) wildlife refuges (C) pesticides (D) sex hormones
- Q.130. The IUPAC name for the complex  $[Co(NO_2)(NH_3)_5]Cl_2$  is  
(A) nitrito-N-pentaamminecobalt (III) chloride  
(B) nitrito-N-pentaamminecobalt (II) chloride  
(C) pentaammine nitrito-N-cobalt (II) chloride  
(D) pentaammine nitrito-N-cobalt (III) chloride
- Q.131. Which of the following statements is true?  
(A)  $H_3PO_3$  is a stronger acid than  $H_2SO_3$   
(B) In aqueous medium  $HF$  is a stronger acid than  $HCl$   
(C)  $HNO_3$  is a stronger acid than  $HNO_2$   
(D)  $HClO_4$  is a weaker acid than  $HClO_3$
- Q.132. Lanthanoid contraction is caused due to  
(A) the appreciable shielding on outer electrons by 4f electrons from the nuclear charge  
(B) the appreciable shielding on outer electrons by 5d electrons from the nuclear charge  
(C) the same effective nuclear charge from Ce to Lu  
(D) the imperfect shielding on outer electrons by 4f electrons from the nuclear charge
- Q.133. In Langmuir's model of adsorption of a gas on a solid surface  
(A) the rate of dissociation of adsorbed molecules from the surface does not depend on the surface covered  
(B) the adsorption at a single site on the surface may involve multiple molecules at the same time  
(C) the mass of gas striking a given area of surface is proportional to the pressure of the gas  
(D) the mass of gas striking a given area of surface is independent of the pressure of the gas
- Q.134. Rate of a reaction can be expressed by Arrhenius equation as:  
 $k = Ae^{-E/RT}$  (where  $E/RT$  is read as power of e) In this equation, E represents  
(A) the energy above which all the colliding molecules will react  
(B) the energy below which colliding molecules will not react  
(C) the total energy of the reacting molecules at a temperature, T  
(D) the fraction of molecules with energy greater than the activation energy of the reaction
- Q.135. The pressure of sulphur dioxide in a container is 159kPa what is its pressure in atms.  
(A) 0.029 atm (B) 5.25 atm (C) 1.57 atm (D) 159000 atm
- Q.136. Reverse Osmosis is a process  
(A) by which waste is separated from water by a semi permeable membrane  
(B) in which water is treated with activated carbon.  
(C) which inhibits oxidation of organic substance present in waste water.  
(D) which kills the bacteria present in water

- Q.137. The reason  $\text{SiCl}_4$  is easily hydrolysed as compared to  $\text{CCl}_4$  is that**  
(A) the bonding in  $\text{SiCl}_4$  is ionic  
(B) silicon is non – metallic  
(C) silicon can extend its coordination number beyond four.  
(D) silicon has filled 3d - orbitals.
- Q.138. Which of the following statement regarding ferrocene is not correct?**  
(A) it is a sandwich compound  
(B) it can undergo Mannich condensation.  
(C) it is less stable than nickelocene and cobaltocene.  
(D) it cannot undergo direct nitration.
- Q.139. The number of NMR signals for the compound  $\text{CH}_3\text{OCH}_2\text{CH}_3$  is**  
(A) One signal (singlet)            (B) Two signals (one singlet, one multiple)  
(C) Three signals (singlets)        (D) Three signals (singlet, quartet, triplet)
- Q.140. If  $t_{1/2}$  of a reaction is halved as the initial concentration of the reaction is doubled. Then the reaction is**  
(A) first order                    (B) second order            (C) zero order    (D) pseudo first order
- Q.141. 20 g of ice at 0 degrees C is dropped into a beaker containing 120 g of water at 70 degrees C .The final temperature of the mixture ( neglecting heat capacity of beaker ) and assuming heat of fusion of ice as 80 cal/ g is**  
(A) 13.7 degree C            (B) 78 degrees C            (C) 48.57 degrees C        (D) 18 degrees C
- Q.142. Main constituent of natural rubber is**  
(A) poly styrene            (B) poly isoprene            (C) poly butadiene        (D) poly propylene
- Q.143. Crookes glass used for sunglasses contains**  
(A) Boron                    (B) Lanthanum            (C) Cerium                    (D) Cobalt
- Q.144. The polyvinyl resin is a**  
(A) natural polymer  
(B) a polymer obtained from compounds having vinyl ( $\text{CH}_2=\text{CH}$ ) group  
(C) obtained by the polymerisation of monosaccharides  
(D) polymerization of diols and alkenes
- Q.145. Which of the given compounds is a Thermoplastic resin?**  
(A) silicones    (B) Bakelite            (C) polystyrene            (D) vulcanized rubber
- Q.146. Bullet resistant glass is obtained by**  
(A) compressing sheets of glass fabric soaked in phenol formaldehyde resin  
(B) pressing together several layers of glass with vinyl resins in alternate layers  
(C) placing non brittle plastic sheet between two thin glass plates  
(D) mixing rare earth oxides to glass
- Q.147. Cermets are materials obtained by mixing**  
(A) cement with glass powder            (B) ceramic materials with glass powder  
(C) ceramic materials with metal powder        (D) cement with metal powder
- Q.148. 250 ml of a water sample gave 0.110 g of  $\text{Ca C}_2\text{O}_4 \cdot \text{H}_2\text{O}$ . The calcium content in the sample in ppm is**  
(A) 12.0            (B) 0.012            (C) 0.120            (D) 120
- Q.149. What is the entropy change for vaporization of 1 mole of liquid water to steam at 100°C if  $\Delta H_v = 40.8 \text{ kJmol}^{-1}$ .**  
(A) 49kJ /K/mol            (B) 109.38 J/K / mol        (C) 84 J / mol            (D) 100 J /K /mol
- Q.150. “The existence of charges of opposite signs on the fixed and diffuse parts of the double layer leads to the appearance of a difference of potential between the two layers.” The difference of potential is known as**  
(A) Zeta potential            (B) kinetic potential  
(C) Brownian potential        (D) electrochemical potential

**Key (Code: 3.3)**  
**Post: Manager (QC) Kapurthala**
